Endeavor Services Group Announces EndeavorToner.com

Corning, New York October 15, 2010 - Endeavor Services Group, LLC is pleased to announce their new website (www.endeavortoner.com) featuring remanufactured compatible toner cartridges for Printers by HP, Lexmark, Brother and more. Providing compatible, eco-friendly toner cartridges, available for multiple brands and models of printers; provide businesses a way to reduce expenses without compromising performance or reliability.

Endeavor toner products represent the industry's most sophisticated technology and are passed on to their customers following strict inspection and performance testing. Endeavor has a committed goal to provide the most exceptional print quality the compatible industry offers. Page-for-Page Endeavor guarantees that the quality of their remanufactured toner cartridges will match or exceed that of an original equipment manufacturer (OEM) product. When remanufactured properly under the highest quality control, it's our belief remanufactured compatible toner cartridges perform as well as, or better than, new cartridges.

Business today is looking for ways to reduce cost, while being more environmentally friendly. Using remanufactured toner cartridges is one way to do that, by reducing pollution and minimizing the amount of waste materials, such as plastic, metal, and rubber, disposed of in landfills. Additionally, reducing the need for virgin materials used to make new cartridges also conserves natural resources. For each pound of new material used in remanufacturing, 5 to 9 pounds of virgin materials are conserved.

Remember, when you take environmental considerations into account in your purchasing decisions, you are helping to save money, create a safer and healthier environment and workplace, by buying products made from remanufactured materials. Check out our specials today at (www.endeavortoner.com).
